

Figure 1 is a heatmap showing the win rate of the defendant in a signaling game. The x-axis represents the defendant's signal (D: 1/16 to 15/16) and the y-axis represents the plaintiff's signal (P: 1/16 to 15/16). The color scale indicates the win rate from 0% (white) to 100% (dark blue). The win rate is generally higher when the defendant's signal is higher than the plaintiff's signal.
