

Figure 1 is a heatmap illustrating the win rate of the proposed method across different defendant signals (D) and plaintiff signals (P). The x-axis represents the defendant signal (D), ranging from $\frac{1}{16}$ to $\frac{15}{16}$. The y-axis represents the plaintiff signal (P), ranging from $\frac{1}{16}$ to $\frac{15}{16}$. The color scale indicates the win rate, ranging from 0% (white) to 100% (dark blue). The win rate is generally higher for higher defendant signals and lower for higher plaintiff signals.

D \ P	$\frac{1}{16}$	$\frac{3}{16}$	$\frac{5}{16}$	$\frac{7}{16}$	$\frac{9}{16}$	$\frac{11}{16}$	$\frac{13}{16}$	$\frac{15}{16}$
$\frac{1}{16}$	14.2%	14.5%	14.9%	15.4%	17%	19.8%	23.5%	23.9%
$\frac{3}{16}$	14.5%	14.9%	16.1%	17.9%	19.8%	21.7%	23.1%	23.5%
$\frac{5}{16}$	14.9%	15.4%	16.1%	17.9%	18.8%	20.8%	22.5%	23.1%
$\frac{7}{16}$	15.4%	16.1%	17.9%	18.8%	19.8%	21.7%	22.5%	23.1%
$\frac{9}{16}$	17%	17.9%	18.8%	19.8%	20.8%	21.7%	22.5%	23.1%
$\frac{11}{16}$	19.8%	19.8%	20.8%	21.7%	22.5%	23.1%	23.5%	23.9%
$\frac{13}{16}$	23.5%	23.1%	22.5%	21.7%	20.8%	20.8%	20.8%	20.8%
$\frac{15}{16}$	23.9%	23.5%	23.1%	22.5%	21.7%	20.8%	20.8%	20.8%
